Week of: August 14th

CLASSROOM NEWS

Math: This week, we will start working on Topic 1 of enVision Math. Topic 1 covers how to generalize place value understanding. We will be looking at place value, comparing whole numbers, and rounding whole numbers. To begin, we will be taking the pre-assessment today!

Reading: We are continuing with the anchor text, "Flying Solo." This story is about students who run the classroom because the teacher never shows up! Our main focus will be on questioning and determining character, settings, and events.

Writing: Last week, we chose our research topic and developed questions to start our research. This week, we will review those questions and go over responsible and effective research methods.

Science: In science, students will be looking at models of various internal body structures and how they function as needed for animal survival, growth, and reproduction.
