Week of: August 28th

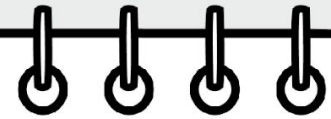

## CLASSROOM NEWS

**Math:** I was so impressed with how we did on the first Topic! I am excited to see how much they will improve throughout the year! We have started Topic 2 which covers adding and subtracting larger numbers. Enrichment and Math Olympiad have started.

**Reading:** We are wrapping up Flying Solo! This week, we will be using Junior Great Books to practice reading strategies and annotating stories. We are reading the story "Yes, M'am" this week.

**Writing:** Our first writing project is behind us! Expect to see it in you child's Thursday folder. Our next project will be all about comparing and contrasting characters from Flying Solo and using text evidence in our essays. We will focus a lot more on structure this week, such as paragraphs, indentation, topic and closing sentences.

**Science:** This week is all about animal adaptations. How do animals need to adapt to survive. We will also look at biomimicry: how scientists use animal features to create different tools and inventions.
